

203-946-DW (all sections) Fall 2017

Teacher Chris Roderick 7A.10, local 4008, croderick@dawsoncollege.qc.ca

Pre-requisites Secondary IV Mathematics 563-404, Secondary V Physics 553-504

Co-requisites None

Ponderation 2-3-3 (2 hours of lecture, 3 hours of labs, and 3 hours of work outside class per week)

Course objectives

This course will cover some of the basic concepts of biomechanics. Students will learn the laws governing motion, forces and their interactions, work, energy and rotation. These notions will be applied to problems involving equilibrium, movement, and the limits of the human body. Fundamental concepts of waves and electricity will also be covered as an introduction to therapeutic electrotherapy techniques.

Detailed information regarding the objectives and standards for the competencies related to this course and the speci c performance criteria is available at https://www.dawsoncollege.qc.ca/oad/

professi onal -devel opment/mi ni steri al -program-documents/.

Course

This course will allow the student to fully achieve the competency:

competencies OO2Z: To analyz

ni-uoi19]TJ 0 -33(therb(3)-333(hm8(ered)-333al)-327(f)-334(lab)1(s)Td [(ni-un)-327(b)-28(s)b83(.)ction)-442(F)80

Reference materials

1. Physics for the Life Sciences, by Alan H. Cromer, McGraw-Hill.

Teaching methods

The material will be presented using a mix of active learning activities, lectures, in-class problem solving, laboratory experiments and demonstrations. Laboratory periods will be used for experiments as well as class tests and lectures.

Attendance & participation

Although class attendance is not compulsory, students should make every e ort to attend all classes. In the event that a class is missed, the student is responsible for all material covered or assigned during that class. Attendance during laboratory experiments and for class tests is however compulsory. In the rare event that a student for valid reason (e.g. due to an intensive course, illness, etc.) is or anticipates to be absent during a laboratory experiment or for a class test, the student must, where possible, inform the teacher and provide the necessary documents before the absence or, at the latest, on the day of their return. If the absence is excused, students will have the opportunity to complete the assessment.

All other assessments (readings, quizzes, lab activities, *etc.*) missed due to absence are: assigned a grade of zero where the absence is not excused;

Course content

The material to be covered is contained in the following chapters of the text.

Weeks	Topics	Chapters
0{1	Units, Vectors, and math review	1
1{3	Forces, static equilibrium, applications to physical rehab	2
4{7	Torque, equilibrium, more advanced applications	3
8	Physics of solids and biological materials	10
9{10	Energy and Power	5
11{12	Waves and Sound: Properties of waves, propagation, superposition,	12{13
	resonance, ultrasound therapy, etc.	
13{14	Electricity: Current, voltage, circuits, safety, AC/DC, electrotherapy	17
15	Review	{

Note: The above schedule is tentative.

Questions outside class

All regular day program teachers will be available in their respective o ces to their students during posted o ce hours. In the rst week, your teacher will inform you of their schedule and will post it outside their o ce.

Room 7A.1 is the physics study room. At scheduled times, a teacher or peer tutor will be on duty there to answer your questions. The schedule of teachers and peer tutors will be posted outside of 7A.1 in the 2nd or 3rd week of term.
